

PREVENTIVE MEDICATION PROGRAM

Drug List

Coverage as of January 1, 2022

Preventive medications are used to prevent certain conditions from developing, or to prevent a condition from coming back. These conditions include, but are not limited to, asthma, depression, diabetes, heart attack, high blood pressure, high cholesterol, osteoporosis, prenatal nutrient deficiency and stroke.

About this drug list

This is a list of the most commonly prescribed generic and brand-name medications that are part of Cigna's preventive program as of January 1, 2022.^{1,2} Medications are listed alphabetically by condition. **This drug list doesn't include preventive medications that are covered at 100%, or no cost-share (\$0) to you, under the Patient Protection and Affordable Care Act (PPACA)'s preventive services coverage requirement.**

This drug list is updated often so it isn't a complete list of medications. Also, your specific plan's preventive medication program may not include all of these medications and/or conditions. Log in to the **myCigna**[®] App or **myCigna.com**, or check your plan materials, to see all of the medications included in your plan's preventive medication program and how much they cost.

Here's some helpful information about this drug list:

- Medications are listed alphabetically by condition.
- Generic medications are listed in all lowercase letters and brand-name medications are listed in all capital letters. Most brand-name medications that have a generic equivalent are no longer part of Cigna's preventive medication program.

Your cost-share for preventive generic and brand-name medications

Not all plans offer the same cost-share for their preventive medication program. For example, some plans may require you to pay a copay, coinsurance and/or deductible for preventive generic and brand-name medications; other plans may not.

Log into the **myCigna** App or **myCigna.com** and use the Price a Medication tool to see how much your medication may cost you at the different pharmacies in your plan's network.³

Go generic and save

Ask your doctor if a preventive generic medication may be right for you. Generics have the same strength and active ingredients as brand-name medications, but often cost much less - in some cases, up to 85% less.⁴

Together, all the way.[®]

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company, or their affiliates.

Preventive Medication Program Drug List

Some plans may not include all of these medications and/or conditions in their preventive medication program. Log in to the **myCigna** App or **myCigna.com**, or check your plan materials, to see which medications your plan includes in the program and how much they cost.

Prenatal Vitamins

Your plan considers all prescription strength prenatal vitamins to be "preventive."

Log in to the **myCigna** App or to **myCigna.com**, or check your druglist to see which tier your plan covers prenatal vitamins on.

Generic medications are listed in all lowercase letters and brand-name medications are listed in all capital letters.

1. State laws in **Texas** and **Louisiana** may require your plan to cover your medication at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval from Cigna before your plan will cover it, these changes may not begin until your plan's renewal date. To find out if these state laws apply to your plan, please call Customer Service using the number on your Cigna ID card.
2. State law in **Illinois** may require your plan to cover your medications at your current benefit level until your plan renews. This means that if you currently have approval through a review process for your plan to cover your medication, the drug list change(s) listed here may not affect you until your plan renewal date. If you don't currently have approval through a coverage review process, you may continue to receive coverage at your current benefit level if your doctor requests it. To find out if this state law applies to your plan, please call Customer Service using the number on your Cigna ID card.
3. Prices shown on myCigna are not guaranteed and coverage is subject to your plan terms and conditions. Visit myCigna for more information.
4. U.S. Food and Drug Administration (FDA) website, "Generic Drugs: Questions and Answers." Last updated 03/16/21. <https://www.fda.gov/drugs/questions-answers/generic-drugs-questions-answers>.

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.
